

THE UNIVERSITY OF AZAD JAMMU AND KASHMIR MUZAFFARABAD

Department of Software Engineering

Subject: Graphic designing

Instructor: Engr. Mam fatima

Semester: 4th SET

Session: 2024 – 28

Quiz No. 1

Name: Syed Jaffar Mukhtar

Roll No: 2024 – SET – 19

Quiz no 1

This picture shows a modern mobile app login screen design for a coding platform called Vix Coder. The interface uses a dark theme with vibrant pink and purple gradient colors, giving it a stylish and futuristic appearance.

At the top center, the screen features the Vix Coder logo, designed with a creative “VX” symbol and a coding icon (</>), which represents programming and technology. Below the logo, the slogan “Code. Create. Inspire.” highlights the app’s purpose of encouraging creativity and coding skills.

The login section contains two input fields:

- **Email or Username** field for user identification
- **Password field** with a visibility icon to show or hide the password

A “**Forgot Password?**” option is placed below the password field to help users recover their accounts if needed.

The main action button is a large gradient **Login button**, which stands out clearly against the dark background. At the bottom, there is a Sign Up option for new users who do not already have an account.

The overall design is clean, user-friendly, and visually attractive, using glowing neon effects and smooth curved lines to create a professional and modern UI experience.
